# CYWARE™

Cyber Fusion Center

Deliver a faster, intelligent, and proactive response to threats with Cyber Fusion. Unite threat intelligence and SOAR to automate any tool, orchestrate any environment, leverage data from every source, and enable collaboration across silos.

Cyber Fusion Center performs rapid threat prediction, detection, analysis, and better incident response by leveraging contextualized threat intelligence, data from every source, and advanced automation. Cyber Fusion also unifies threat management across trusted ecosystems by enabling bi-directional sharing and proactive security collaboration.

- ▶ Orchestration beyond incident response
- ▶ Threat Intelligence, fully contextualized and correlated
- ▶ Automated and customizable case management

- ▶ Informed actions across the security ecosystem
- ▶ Comprehensive visibility to yield intelligent actions
- ▶ Collaboration to enable proactive response

Security Innovation with Cyber Fusion

Capability	Traditional SOC	Cyber Fusion Center
Threat Intelligence Orchestration	❌	✅
Case Management and Response	Limited to Incidents Only	Full Threat Response
Data Unification (Human and Machine Readable)	Limited	Full
Vendor-Neutral Automation	❌	✅
Risk Based Decision Making	❌	✅
Centralized Governance and Visibility	Limited	Full
Internal and External Inter-Team Collaboration	❌	✅

➤ Reduce risk and drive security across any trusted ecosystem. Carve a path towards Cyber Fusion for your SOC.

➤ Connect security teams, tools, processes, and environments for enhanced collaboration and proactive, intelligent threat response

➤ Start anywhere with any initiative you choose – TIP, SOAR, or Collaboration – with Cyware's modular Cyber Fusion Center Platform
