Intel Exchange (CTIX) is a fully automated Threat Intelligence Platform (TIP) that automates ingestion, enrichment, and prioritization of threat intelligence through advanced Artificial Intelligence (AI) to transform raw data into intelligent action. Native integration with collaboration and orchestration tools enable organizations to automate actions, remediate incidents, and share, manage, and action threats proactively across siloes or trusted ecosystems.

**End-to-End Threat Intelligence Management System**

- Ingest Data from Anywhere, in Any Format
- De-duplicate and normalize data to reduce noise
- Enrich data with context and correlate
- Prioritize Threat data for Proactive Actioning
- Orchestrate Anything - Teams, silos, and security tools
- Drive collaboration and information sharing

Cyware helps enterprise cybersecurity teams build platform-agnostic cyber fusion centers by delivering cyber threat intelligence and next-generation SOAR (security orchestration, automation, and response) solutions. As a result, organizations can increase speed and accuracy while reducing costs and analyst burnout.

Cyware’s Cyber Fusion solutions make secure collaboration, information sharing, and enhanced threat visibility a reality for MSSPs, enterprises, government agencies, and sharing communities (ISAC/ISAQ/CERTs and others) of all sizes and needs.
